

I use XM Instant Traffic & Weather everyday to help my commute to East Los Angeles go as smoothly as possible. I can't wait 15 minutes to decide how to go to work. I am paying for the XM service and don't think you should stop them from providing me with up to date info. I enjoy the music & comedy channels as well. I don't think you need to interfere with their programming to satisfy NAB. NAB should get their members to change their programming if they don't think they can compete with satellite radio. This is a capitalist nation, and superior products should not be discouraged. Thank you for your time.
